### PROGRAMMING

HTML • CSS • Python • AWS  
JavaScript • ReactJS • Firebase  
MySQL • Java • Data Science  
Shell • PHP • Dart

### DESIGN

3Ds Max • SketchUp  
Figma • AutoCAD

## COURSEWORK

### UNDERGRADUATE

Containers and Orchestration  
Information Security  
Cloud Computing  
Programming  
Operating Systems  
Computer Networks  
RDBMS  
Web Technology  
Data Structures  
Software Engineering

## PERSONAL INTERESTS

Reading Fiction  
Gaming  
Classical Dance

## EXPERIENCE

### SOCIAL FOUNDATION WEBSITE | HTML/CSS

- Currently developing a website for a social foundation.
- Assisting in expanding the foundation's reach through the ongoing website development and collaborating with the foundation team to represent their mission and objectives.

## PROJECTS

### CAMPUS COLLAB | REACTJS/FIREBASE

- Developed an intuitive Campus Collab app using HTML, CSS, and ReactJS, enhanced with Firebase for seamless user authentication and data management.
- Engineered a user-friendly interface connecting students, faculty, and staff, ensuring smooth navigation through various academic features.
- Implemented interactive elements, such as event management and club coordination, to simplify and enhance the campus experience.

### UNIVERSITY WEBSITE | HTML/CSS/JAVASCRIPT

Designed and built a dynamic university website integrating Google Maps API and interactive forms using HTML, CSS, and JavaScript

### NETFLIX CLONE | HTML/CSS

Created a Netflix-inspired website using HTML and CSS, mimicking the visual design and layout of the original site.

### NETFLIX SUBSCRIPTION PAGE | HTML/CSS

Created and Developed a Netflix subscription web page, providing an interactive interface where users can select their preferred watch plans.

### QUOTES GENERATOR | HTML/CSS/JAVASCRIPT

- Created a dynamic quotes generator using HTML, CSS, JavaScript, and an API.
- The generator provides a different quote with every click and offers the option to tweet the generated quote directly.

### TIMER | PYTHON

- Developed a Python-based GUI timer webpage having a user-friendly interface.
- Implemented interactive features for setting timing, start, and stop buttons.

### DATA SCIENCE MINI PROJECT | PYTHON

Gained valuable experience in utilizing popular Python libraries such as NumPy, Pandas, and Matplotlib

### NOTE MAKING APP | XML/ FIREBASE

- Contributed to a group project in mobile computing and Developed "Notes Pro," a note-making app that included features such as creating notes, assigning titles, and deleting notes.
